

# Production and decay of baryonic resonances in pion induced reactions

*Monday, 6 June 2016 13:00 (0:30)*

## Collaboration

HADES

## Abstract content

An overview of experimental world database as well as theoretical models (in particular partial wave analysis) will be given. An example of the unique data gathered by HADES experiment both in hadron and dilepton channel will be presented. (t.b.c.)
